ABOUT

Bit & Grain replaces 4 to 6 separate tools (CRM, scheduling, invoicing, equipment tracker, client comms, AI assistant) with one unified system for the 1-to-5-person trade business. The integrated voice and chat AI assistant (Grain AI) lets contractors run the business hands-free from a job site. Bit & Grain serves owner-operators who are out doing the work AND running the business, without enterprise dispatch UI baggage. Free tier available. Pro tier at \$29/month.
